MOBA — DE NIEUWE PUZZLE

De MOBA puzzle bestaat slechts uit twee onderling verschillende deelen, terwijl elk deel in vier verschillende kleuren wordt geleverd, n.l. groen - wit - rood en zwart.

Het kenmerkende van de MOBA puzzle is dat niettegenstaande slechts twee verschillende deelen worden gebruikt, toch practisch elke figuur kan worden gemaakt.

Hoe men de MOBA deelen ook legt, altijd kan men in elke gevormde hoek weder een der beide deelen passen, zoodat men er ten slotte een tafel mede zou kunnen bedekken, zonder gaten.

Dit voorbeeldenboekje biedt reeds verschillende mogelijkheden. De eerste bladzijden geven U zeer eenvoudige voorbeelden: die op de oneven bladzijden kunt U eenvoudig naleggen, die op de even bladzijden moet U weer zelf uitpuzzlen.

Dan volgen moeilijker voorbeelden, welke schier onvindbaar lijken (zie bijv. blz. 12 en 14), en geven de laatste bladzijden voorbeelden van levende wezens.

De groote moeilijkheid bij deze laatste bladzijden is, behalve de figuur zelve, het vinden van de juiste kleuren om het wezen „levend” te maken.

Reeds bij het maken van eenige der eenvoudigste figuren zult U verbaasd zijn over de ongekennde mogelijkheden welke MOBA biedt, en door de twee-vorm, en door de kleuren.

Losse deelen zijn steeds verkrijgbaar.
